

DON'T GET LOST IN THE COST ANALYSIS JUNGLE.

Let Factory Commander® Be Your Guide.

Today's increased focus on manufacturing costs and return on investment (ROI) can make even the most seasoned financial professional feel lost.

Could current operations be improved? Will future operations meet financial requirements? Now there's a software tool that guides you on these time-critical missions, and clears the way to reaching your goal.

Factory Commander® is a Cost and Resource Evaluation model that can be applied to any discrete manufacturing or assembly operation. It performs high-level cost analyses of overall factory and individual product costs, manufacturing capacity and revenues. You can apply these features both to strategic new factory design and tactical current factory optimization.

Don't let the complexity of large-scale investments grind your decision-making process to a halt. When it comes to reducing risk and increasing profitability, Factory Commander® is your compass.

Factory Commander® is supported by the world's leading operational modeling software and services provider, Wright Williams & Kelly, Inc. Whether you need a software tool or a staff of on-site manufacturing experts, we meet your business needs with the most cost-effective solutions possible.

From Cost of Ownership (COO) and Overall Equipment Effectiveness (OEE) to full factory analysis, only Wright Williams & Kelly, Inc. offers a full range of solutions. So let Factory Commander® clear your way to greater profitability.

Real Tools for Real People Making Real Decisions.™
