

FACTORY COMMANDER®

OVERVIEW

LET FACTORY COMMANDER® BE YOUR GUIDE

Today's increased focus on manufacturing costs and return on investment (ROI) can make even the most seasoned professional feel lost. Could current operations be improved? Will future operations meet financial requirements? Now there's a software tool that guides you on these time-critical missions, and clears the way to reaching your goal, Factory Commander®.

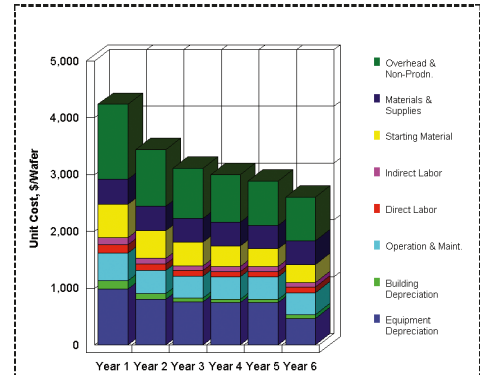

Developed with Sandia National Laboratories, Factory Commander® is a Cost and Resource Evaluation software platform that can be applied to any discrete manufacturing or assembly operation. It performs high-level cost analyses of overall factory and individual product costs, manufacturing capacity, and revenues. You can apply these features to both strategic new factory design and tactical current factory optimization.

With its proven track record, Factory Commander® is ready to address your critical business applications. From capacity planning and product costing to strategic and resource planning to product positioning, Factory Commander® has the power and flexibility to meet the needs of both manufacturers and suppliers. Add WWK's available data sets and you are ready to jump start your learning curve and start answering your key business questions today.

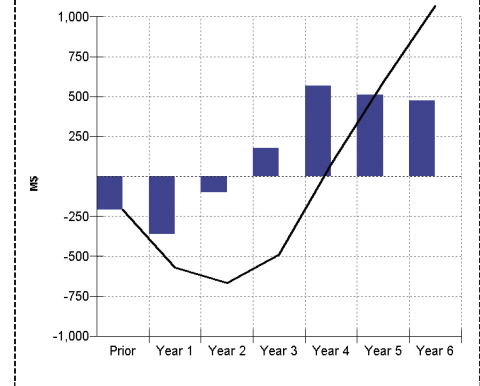

Don't let the complexity of large-scale investments grind your decision-making process to a halt. When it comes to reducing risk and increasing profitability, Factory Commander® is your compass. Join the list of Fortune 500 companies that are achieving multi-million dollar savings. Factory Commander® is the standard for leading IC, flat panel display, magnetic media and solar panel manufacturers, equipment and material suppliers, and 300mm consortia.
