When Texas Instruments talked; we listened. When they ordered; we delivered. And when they wanted results; we gave them results.

Our software and training tools have greatly impacted Texas Instruments on a fundamental level, helping them manage their multi-billion dollar capital asset portfolio effectively and efficiently. We delivered the products and services and far exceeded their expectations.

And we won! Not only their trust and satisfaction but also their 1996 Supplier Excellence Award. Thank you Texas Instruments!

Wright Williams & Kelly is a cost reduction modeling and simulation company focusing on real tools for real people making real decisions. Since 1991, we have been providing industry with technology-dependent and technology-driven software solutions for productivity measurement and enhancement.

We can bring the same level of commitment to your organization. Call us today to find out how.
